

## Triplex Plunger Pump K 10000 – 3G

P 15-1

31.07.2019

KAMAT's K 10000 high-pressure pump offers a wide spectrum for industrial process applications. Specialized units customized for sea water, glycol, methanol, oil and other services on request. The classic KAMAT modular component system allows modification of the pump's duty by simply by changing a few component parts. The simplified design makes possible on site retrofitting with very little outlay. Like all KAMAT models, the pumps perform reliably, operate with low crankshaft speeds that reduce wear and cavitation.

- Flow rate is based on 100% volumetric efficiency and 20°C ambient temperature
- Min. inlet pressure depending on fluid medium
- Speed range 10-100% depending on rod force
- Gear dynamically balanced
- Gear with force-fed lubrication (> 110 kW with oil cooler)
- Standard gear ratios  
 $i = 3,00 - 3,14 - 3,39 - 3,76 - 4,13 - 4,50 - 4,93$
- API 674 compliant designs
